

Characteristics and classification

Name the seven characteristics of living organisms.

Characteristics and classification

Define respiration.

Characteristics and classification

Define growth.

Characteristics and classification

Define excretion.

Features of organisms **Supplement**

State the features of a virus.

The chemical reactions in cells that break down nutrient molecules and release energy for metabolism.

Movement, respiration, sensitivity, growth, reproduction, excretion, nutrition (MRS GREN).

The removal of the waste products of metabolism and substances in excess of requirements.

A permanent increase in size and dry mass.

A protein coat and genetic material.
